

A close-up photograph of a bartender with long brown hair, wearing a dark blue shirt, pouring a golden liquid from a large, clear glass pitcher into a glass. The background is a bar with various bottles of alcohol. The lighting is warm and focused on the bartender and the glass.

MAXIGLASS

With larger capacity, brighter lights and more energy saving features, the best just got better.

MAXIGLASS Bottle coolers

Chill more. See more. Save more.

- ◇ Market leading capacity on a minimal footprint - nearly 10% greater capacity compared to the previous market leading Maxiglass range.
- ◇ Vertical LED lights for a beautifully illuminated glass display area, encouraging impulse purchases.
- ◇ With up to 30% energy savings compared to the previous range, the MG3 is one of the greenest bottle coolers on the market.

Available in 3 heights, multiple widths and with hinged or sliding doors, meaning there's a Maxiglass to suit every need.

Innovative flat shelving design ensures no more 'wobbly' bottles, meaning effortless stocking and retrieval of drinks.

Superior storage capacity in its class. The MG3 range can store between 143 and 480 bottles!

Top mounted doors locks as standard for keeping your contents safe and secure.

Two dimmable vertical lights with even illumination to show the drinks in a desirable light, inspiring impulse purchases.

Upgraded low maintenance condenser design reduces the need to clean, and means your product doesn't have to work as hard.

The green machine

Our most popular Maxiglass products have a one piece fully foamed shell which significantly improves temperature performance, maintaining the cold air for longer, reducing your energy bills.

A view from the top

The controller is positioned at the top of the Maxiglass to avoid accidental damage, and drinks spillages from within the cabinet.

Space saving

When space is at a premium, why not choose a sliding door model?

Another bright idea

Maxiglass features a new vertical LED light per door section, so bright, we had to engineer a dimmer switch.

Introducing increased Bottle capacity

The Maxiglass range has outstanding capacity and can store between 143 and 480 bottles. Large capacity bottle coolers mean that you won't need to restock as often, saving time for your staff and limiting door openings.

MG3/150

181x 250ml bottles or
143x 330ml bottles

MG3/300

310x 330ml bottles

MG3/250

260x 250ml bottles or
225x 330ml bottles

MG3/500

480x 330ml bottles

MG3/275

370x 250ml bottles or
322x 330ml bottles

MG3/315

415x 250ml bottles or
366x 330ml bottles

Levelling feet

These feet enable the product to be installed level on uneven floors, ensuring the product remains in position during operation and the height can be adjusted.
